

Magento PayBy Module Overview

1 Description

Magento PayBy payment gateway module.

1.1 Requirement

1. Support AED for currency

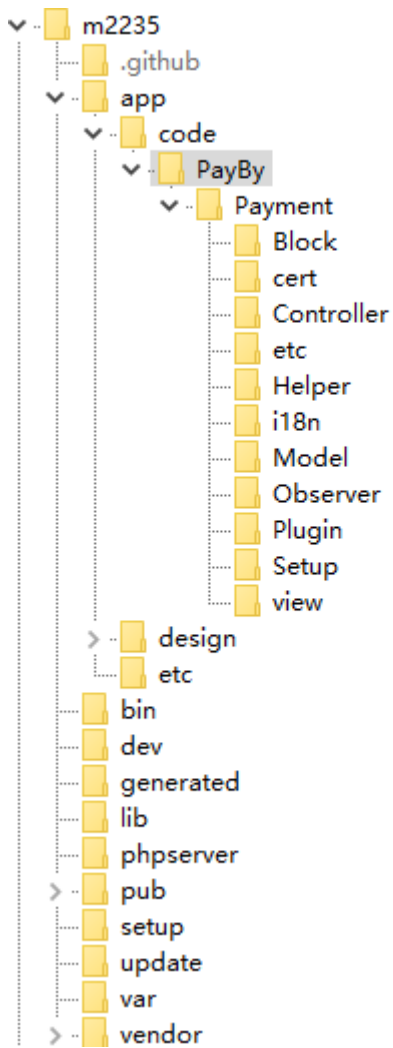

The screenshot displays the Magento Admin interface for the 'Currency Rates' configuration page. On the left is a vertical sidebar with navigation icons and labels: DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main content area has a header with the title 'Currency Rates', a search icon, a notification bell with '3', and a user profile 'admin'. Below the header is a table with two columns: 'AED' and 'USD'. The 'AED' column has a value of '3.6700' and the 'USD' column has a value of '1.0000'. Above the table, there is an 'Import Service' dropdown menu set to 'Fixer.io' and an 'Import' button. To the right of the table are buttons for 'Options', 'Reset', and a prominent orange 'Save Currency Rates' button. The footer contains the Magento logo, copyright notice 'Copyright © 2020 Magento Commerce Inc. All rights reserved.', and version information 'Magento ver. 2.3.5-p1' with links to 'Privacy Policy' and 'Report an Issue'.

	AED	USD
USD	3.6700	1.0000

1.2 Installation

1. Set up the Magento
2. Upload the "payby_magento-payment-gateway.zip" file to Magento's server.
3. Unzip "payby_magento-payment-gateway.zip" to sub folder app/code that you would get folder structure similar to following:

4. Login Magento server with your favorite SSH client e.g. putty, and entered Magento's root folder. Run following command one by one:
php bin/magento module:enable PayBy_Payment
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy
php bin/magento cache:clean
